OUTPUT AND SALES OF USSR RADIO AND COMMUNICATIONS EQUIPMENT

BUILD RADIO SYSTEMS AND RADIOS -- Riga, Sovetskaya Latvya, 3 Sep 52

The Riga VEF Plant has developed a system for transmitting radio programs on telephone circuits instead of using special radio transmission lines.

The Riga Radio Plant imeni A. S. Popov will build over 1,000 of these systems in 1952.

Riga, Sovetskaya Latvya, 2 Oct 52

The Riga VEF Plant has built the first 100 class-1 Mir radio receivers.

Moscow, Pravda, 19 Nov 52

The Riga VEF Plant is mass producing Baltika radio receivers.

LACK OF ORGANIZATION HINDERS PRODUCTION -- Vil'nyus, Sovetskaya Litva, 10 Sep 52

The Vil'nyus El'fa Electrical Equipment Plant has not been fulfilling its production plan owing to the lack of organization and sluggishness in the manufacture of new products.

The alteration of dies and the production of parts for a universal electric record player take from 20 to 25 days. However, owing to the poor work of its design bureau, the plant, after 2½ months, is still unable to series-produce the record player. On 19 August 1952, the OTK (Division of Technical Control) rejected as defective all of the universal record players assembled in a certain week. Further assembly of the record players has been brought almost to a halt.
